

ISMS

At ISMS, we play an important role in bringing life-changing treatments to patients and their families. We are a young and dynamic team of professionals with a wide scale of academic backgrounds. Our mission is to support the pharmaceutical and biotech industry in bringing innovative therapeutics to the market, working on innovative treatments in cutting-edge areas, such as immunotherapy and gene therapy. This requires a wide range of skills, encompassing scientific assessments of therapies, business analysis and modelling, scientific content creation, and strategic consultancy.

JOB DESCRIPTION

We are currently looking for a Senior Consultant in Market Access and Health Economics who will work directly with our customers and provide support in areas where science and business come together. The Senior Consultant will simultaneously manage projects, coach junior staff, and generate deliverables – both in the conceptual and executional phases.

We look for people that value working in a small team, with a focus on intellectual and personal growth, in an atmosphere of openness and trust. Together we embrace a spirit of positivity and pride in the team and our projects, in which constructive and result-focused critical thinking is encouraged. Working at ISMS means working as part of a driven and passionate team that will help you broaden and grow your own intellectual capabilities.

RESPONSIBILITIES

- Managing and leading market access and health economic projects within timelines and budgets, working directly with global and regional clients representing leading pharmaceutical and biotech companies.
- Executing and supervising market access projects ranging from early value assessments to value dossier development, tailored to meet clients' needs.
- Executing and supervising health economic projects, such as budget impact and cost-effectiveness modeling.
- Performing quality control checks, ensuring all deliverables meet the required standards of leading pharmaceutical and biotech companies.
- Providing clear and actionable guidance into project methodology in market access and health economic projects.
- Contribute to targeted sales and business development activities to expand ISMS' footprint in Europe and globally.

QUALIFICATIONS

- 7+ years of experience delivering market access and/or health economic projects to clients in the pharmaceutical or biotech industry.
- Expert-level understanding of the HTA process and requirements in key jurisdictions within Europe and globally.
- Experience directly leading market access and/or health economic projects and coaching junior staff to succeed under time and budget pressure.
- Experience communicating and selling market access or health economic services to clients in the pharmaceutical or biotech industry.
- Successful delivery of market access or health economic projects of innovative products in immunotherapy, cell therapy, or gene therapy.

- Advanced degree in healthcare/life sciences, such as an M.Sc.; Ph.D. considered an asset.
- Strategic vision and thinking with excellent communication skills.
- Strong knowledge of MS Office suite, especially PowerPoint and Excel.

CAREER PERSPECTIVES

- You will work on projects supporting highly innovative treatments, such as immunotherapy and gene therapy.
- You will be able to build relationships with commercial teams and brand managers from global leaders in the pharmaceutical and biotech industry.
- You will have an exciting opportunity to work on numerous projects across various therapeutic areas simultaneously.
- You will be able to influence the strategic direction of the company.
- You will have the option to participate in the company's share program.
- You will be seen as a leader in the company and will have the opportunity to directly influence the professional development of junior staff.
